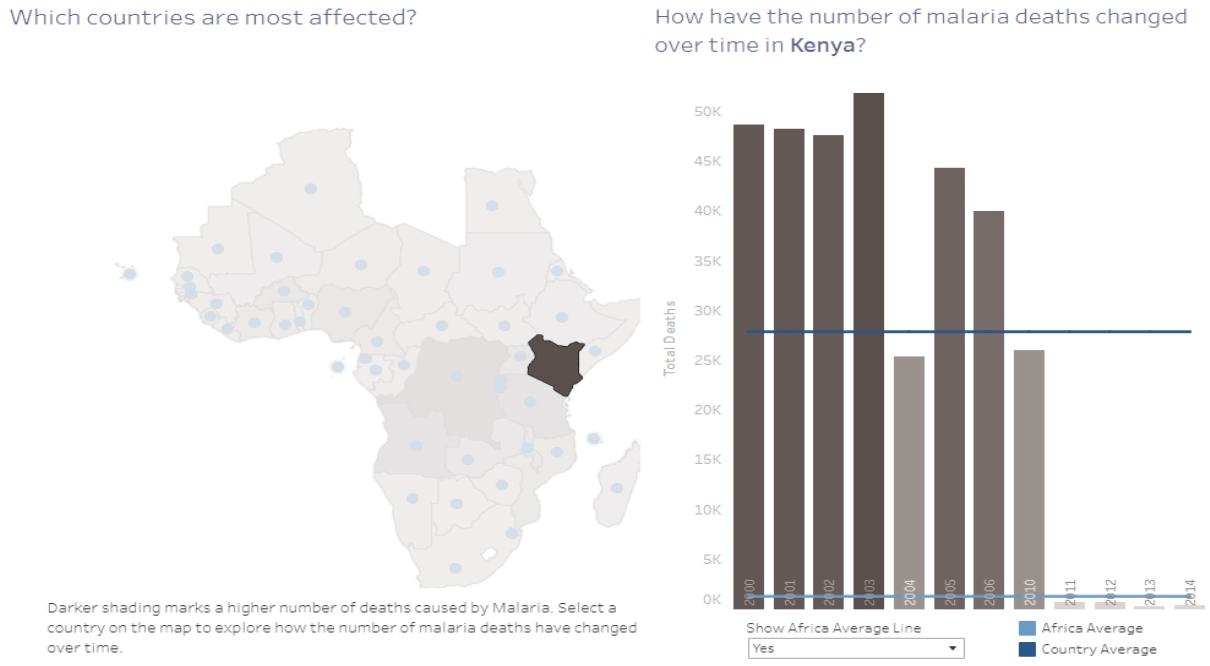
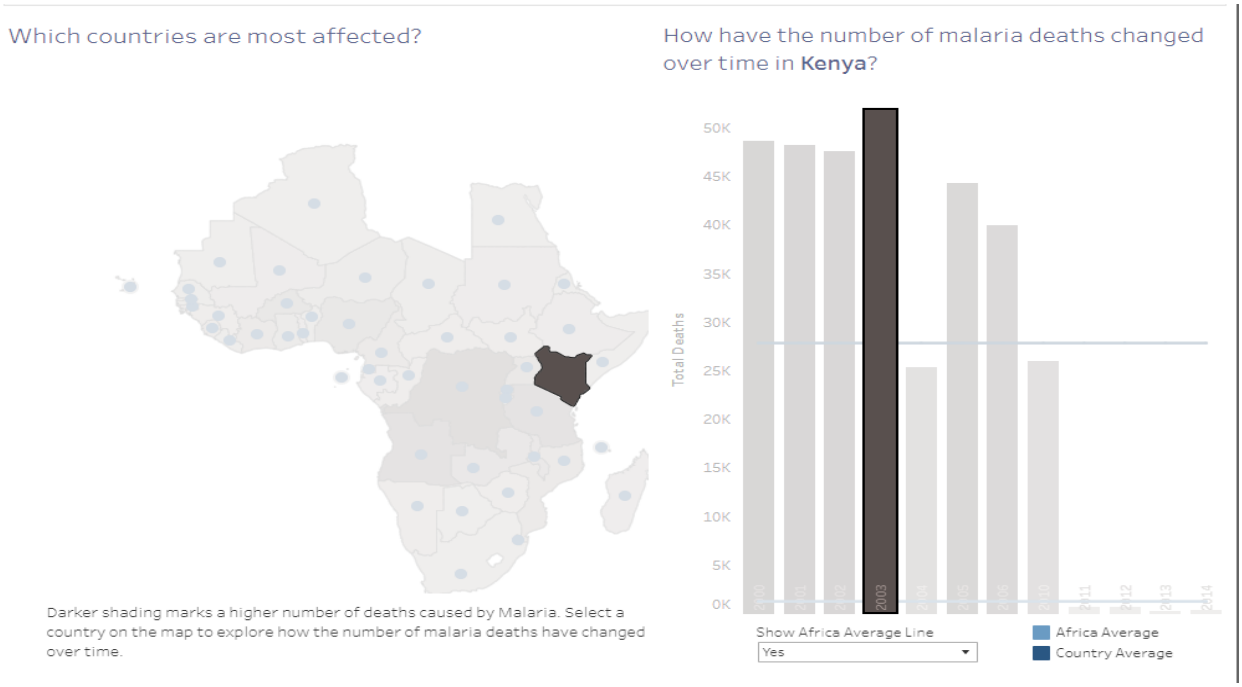
# KENYA: African Country with the Highest Average death rate from 2000 to 2014

Kenya is the country with the highest death rate per year when compared with other African countries. It recorded an average of 27,896 and with a daily death rate of 76.43 from 2000 to 2014.



- From the dashboard, I immediately noticed the Kenya map and clicking on it show more details that reflect the highest average death rate when compared to the rest of the African countries.

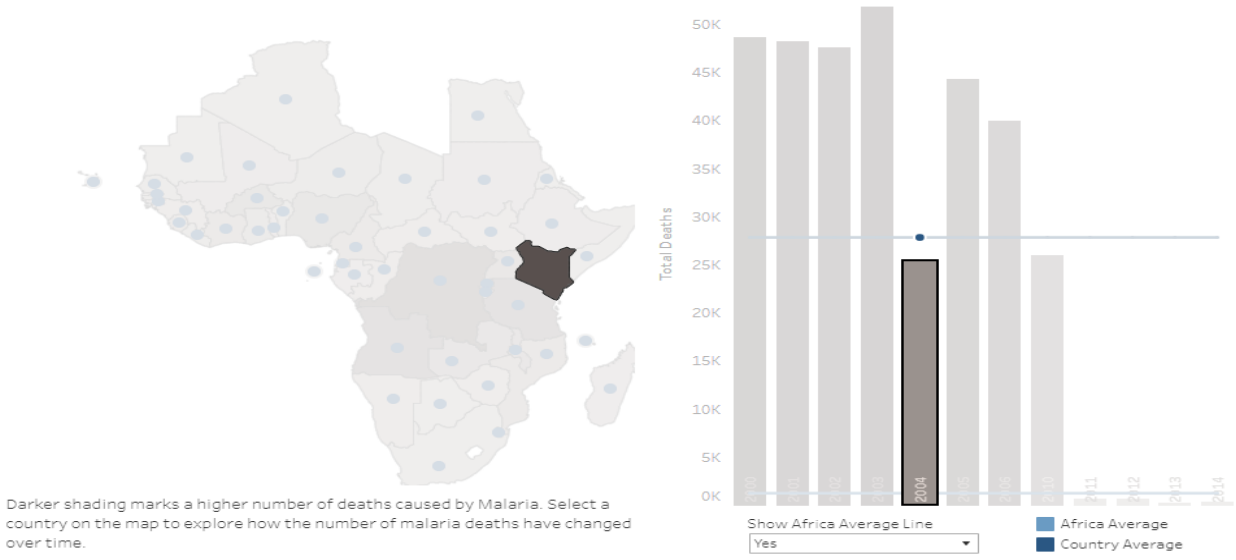
2003 recorded a highest average number of death rates of 51,842:



| Migrated Data Year | Migrated Data Country | Migrated Data Africa Average | Migrated Data Deaths | Migrated Data FLOAT(sum([Deaths])) |
|---|---|---|---|---|
| 2003 | Kenya | 1,303 | 51,842 | 51,842.00 |

- The chart bon the right side on the dashboards details various years from 2000 to 2014 for the average death rate. The 2003 have the highest rate. Clicking on this year on the chart display the details for the recorded average death rate.

While 2004 recorded the least average number of recorded death rate of 25,403:



| # Migrated D... Year | =# Migrated Data FLOAT(sum([Deaths])) | =# Migrated Data Africa Average | # Migrated Data Deaths |
|---|---|---|---|
| 2004 | 25,403.00 | 1,303 | 25,403 |

- From the chart on the right side on the dashboard, it can be seen that the 2004 has the least recorded average death rate which is below the country average rate. A click on that year on the chart reveals the details.
